DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Missing continuation statement at Background, description related art.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. US 6,717,511. Although the conflicting claims are not identical, they are not patentably distinct from each other because: 1) a phone would obviously have a touch-tone feature in it. 2) a flasher would obviously be able control the light, such as intermittently or steady activating. 3) 511' disclose first and second switches, except for specifically disclose the type of switches implemented in the system, the claimed switches implemented are integrated circuit (IC), transistors and relays, it is clear that, they are well known in electrical art, therefore, one having ordinary skill in the art would found it

obvious to implement any of those well known switches in the system as an alternative or part available.
